

AudioTel

Remittance Processing

Read what our customers are saying:

We used to have 4 full time people that spent 8 hours per day to process payments. After installing the AudioTel Remit Plus software, 1 person can do the same job in about 2 to 3 hours.

Patti Hollis
City of McKinney

Does your company have account receivables of more than 50 checks per day?

If you answered “yes” to this question, then you are well aware of the time, effort, and resources necessary to process, and post the payments to your accounting software.

AudioTel has an affordable, easy-to-use solution

AudioTel Corporation has been solving check processing problems for hundreds of community banks for many years, and we now have an inexpensive, automated payment processing solution that will drastically reduce the time and cost of manual, payment posting for small businesses.

AudioTel’s Remit Plus solution is an affordable, turnkey, automated check-posting system that provides companies just like yours with the ability to capture images of checks that have been submitted for payment and credit the payments to your customers’ accounts without manual key entry.

AudioTel’s “CAR/LAR” technology actually “reads” the handwritten amounts of checks, and creates a posting file to export into your billing system. We can even convert the checks to an ACH transaction so that your deposits can be sent electronically to your bank for faster credit.

If you have one, or more employees that spend over 1 hour per day posting payments to your billing system, let us show you how we can save you money. Our package solution has drastically improved payment posting efficiency to companies such as:

Olan Mills	City of McKinney, TX	First Mortgage Corporation
eRemitt	City of Sherman, TX	DiMark Group (Smart Pay)
Teen Mania	FSB Arlington	Direct Mail Processors
Palmdale Water	McDonald Data Services	Republic Bank of Insurances

Remittance Processing

Read what our customers are saying:

We were bringing our lockbox operations in-house; and frankly, we were dreading it. Long hours of training, hiring new personnel, expensive equipment, high maintenance fees — we expected all of this and more.

After 1½ years of in-house processing with our RemitPlus system, we couldn't be happier. This system is easy-to-learn and easy-to-use; we were up and running in a few days and we didn't need to hire new personnel. No expensive equipment or high maintenance fees — RemitPlus offered us competitive pricing and economical solutions, and we've saved \$35,000 a year by eliminating our third-party lockbox provider.

Scott Lehrer
First Mortgage
